SUMMARY

Informatics Engineering (D4) graduate from Politeknik Negeri Jakarta (GPA 3.76/4.00) with hands-on experience building production-ready Android applications using Kotlin and Flutter. During a Mobile Developer internship at PT Petrolab Services, upgraded SDK and dependency compatibility across 3 internal applications and engineered a QR Scan feature that eliminated manual data logging for field technicians. Skilled in end-to-end development—requirements analysis, UI/UX design, implementation, backend/API integration, and testing—both independently and within cross-functional Agile teams.

EDUCATION

Diploma IV in Informatics Engineering | Politeknik Negeri Jakarta

August 2022 – July 2026 | Depok, West Java

GPA: 3.76/4.00 (Cumulative of 144 credits)

PROFFESIONAL EXPERIENCE

Mobile Developer Intern | PT Petrolab Services

August – December 2025 | East Jakarta, DKI Jakarta

- Audited and upgraded SDK versions across 3 internal company applications, achieving full compatibility with the latest Android OS and reducing post-update ANR (Application Not Responding) risk.
- Designed and built a QR Scan feature using Flutter for heavy equipment sample data collection, replacing manual technician logging and cutting field data-entry time.
- Collaborated cross-functionally with Backend, Petroleum Division, and Field teams to ensure error-free delivery of internal applications across a 4-month internship.

PROJECTS & TRAINING

Scrum Master & Mobile Developer | Project Based Learning

March – June 2025 | Politeknik Negeri Jakarta - TIK

- Led a cross-functional team of Data Scientists and ML Engineers as Scrum Master to build a Customer Churn Prediction Android app, from sprint planning through release.
- Integrated XGBoost and TabNet machine learning models achieving 98% prediction accuracy into the Android application.

Mobile Developer | Bangkit Academy - Dicoding Indonesia

August – December 2024

- Completed an intensive curriculum covering Kotlin, Android Development, Mobile Architecture, and Machine Learning Integration under Indonesia's Independent Study program.
- Built “Rasa Nusa,” a CameraX and ML classification-based Android app that detects and auto-generates descriptions for 10+ traditional Indonesian dishes, in collaboration with Cloud Computing and Machine Learning teams.

CERTIFICATIONS

Junior Mobile Programmer | BNSP – LSP Informatika

June 2026

- Certified in core mobile development competencies: application design and development, data persistence and database management, mobile networking, and mobile security.

Associate Data Scientist | BNSP – LSP Informatika

August 2025

- Certified in data analysis, data preprocessing, exploratory data analysis (EDA), data management, and RapidMiner for data-driven decision-making.

COMMITTEE EXPERIENCE

Event Division Talent | Village Community Empowerment Program (P2MD)

November – December 2023 | Bogor Regency, West Java

- Trained 10+ village children in an Ibis Paint workshop, improving participants' foundational graphic design understanding by 20%.

Senior Division Committee | TIKGAMES 2024

April – August 2024 | Depok, West Java

- Managed a 3x3 basketball tournament with 6 participating teams from planning through execution, ensuring smooth competition delivery.

ADDITIONAL

- Technical Skills:** Kotlin, Dart, HTML, CSS, Javascript.
- Soft Skills:** Collaborate, adaptive, flexible, problem solving.
- Framework:** Jetpack Compose, Flutter, Laravel, REST API (Fast API), Firebase.
- Tools & Methodologies:** GitHub, Android Studio, VS Code, Postman, Figma, Scrum/Agile, Unit Testing, Debugging.
- Language:** Indonesian (native) & English (intermediate).
